1. Company Overview

AULAGLOBAL PINNACLE VENTURES LTD is a Nigerian international sourcing, procurement, import, export and project-supply company. We connect businesses, institutions and project requirements with suitable manufacturers, suppliers, equipment solutions and specialist technical partners in Nigeria and international markets.

Our approach is practical and commercially focused: understand the requirement, identify suitable supply options, coordinate procurement and documentation, and support delivery through reliable partners. For regulated or specialist technical projects, design, installation, testing and commissioning are undertaken by appropriately qualified partners.

2. What We Do

International Sourcing

Supplier and manufacturer identification, quotation comparison, sourcing coordination and commercial liaison.

Procurement & Supply

Procurement and supply of general goods, machinery, equipment and project materials based on defined client requirements.

Import & Trade Facilitation

Coordination of international purchasing, supplier documentation, shipment preparation and trade-support activities.

Agricultural Export Development

Development and promotion of Nigerian agricultural commodities for export markets, including sesame seeds, dried hibiscus and other exportable produce.

Manufacturers' Representation

Commercial representation and market-development support for suitable manufacturers and suppliers seeking Nigerian or African opportunities.

Project Supply Coordination

Equipment sourcing and supply coordination for public- and private-sector projects, working with qualified technical partners where specialist engineering or installation is required.

3. Core Business Areas

- International sourcing and procurement
- Import and export of general goods and commodities
- Supply of machinery, equipment and project materials
- Agricultural commodity export development
- Manufacturers' representation and trade facilitation
- Distribution and international business support
- Public- and private-sector project supply coordination

4. Agricultural Export Focus

AULAGLOBAL PINNACLE VENTURES LTD is developing export-market opportunities for Nigerian agricultural products. Current product focus includes sesame seeds and dried hibiscus flowers, with scope to work with other compliant Nigerian agricultural produce as market opportunities develop.

Our export-development activities include supplier/farmer coordination, product presentation, packaging preparation, buyer development, trade-fair participation and coordination of the documentation and quality requirements applicable to each transaction.

5. Project Supply Capability

For institutional and government opportunities, the company operates as a project initiator, international sourcing and procurement coordinator, and equipment-supply partner. We can source from qualified OEMs and manufacturers while engaging Nigerian specialists for surveys, engineering, installation, commissioning, training and maintenance where required.

Areas being developed include security and surveillance equipment, flood monitoring and early-warning equipment, solar-powered community water systems, agro-processing and dehydration equipment, and other fit-for-purpose machinery and infrastructure-related supplies.

6. Our Delivery Model

1. Requirement Definition — Clarify the client's intended use, specifications, quantity, budget framework and delivery location.

2. Supplier & OEM Sourcing — Identify suitable manufacturers and obtain technical and commercial offers.

3. Evaluation & Procurement — Compare specifications, documentation, pricing, warranty, lead time and logistics.

4. Supply Coordination — Coordinate purchase, documentation, shipping and delivery arrangements.

5. Technical Partnership — Where required, engage qualified Nigerian professionals for regulated technical work.

6. After-Supply Support — Coordinate warranty, spare parts, supplier communication and agreed post-delivery support.

7. Why Aulaglobal

Our value lies in connecting Nigerian commercial and project requirements with international supply opportunities while maintaining clear local coordination. We focus on commercially realistic sourcing, transparent supplier engagement and appropriate use of specialist partners rather than overstating in-house technical capabilities.

- Direct international sourcing and supplier engagement
- Flexible procurement across multiple product and equipment categories
- Understanding of Nigerian business and institutional requirements
- Ability to coordinate OEMs, logistics providers and local technical partners
- Growing focus on export promotion of Nigerian agricultural products
- Commitment to documentation, quality requirements and responsible project execution

8. Vision

To build a trusted Nigerian trade and project-supply company that connects local businesses, institutions and products to reliable global opportunities.

9. Mission

To provide dependable international sourcing, procurement, import-export and project-supply coordination through credible suppliers, sound commercial processes and appropriate technical partnerships.

10. Business Values

Reliability	Integrity	Value	Partnership
